SE Batch 2022, Spring Semester 2023

Semester PROJECT (Front End)

Problem Statement:

Create a user-friendly website that connects users with skilled service providers, enabling easy booking of home services and providing a platform for customer reviews. The goal is to streamline the process of accessing and managing home services, enhancing convenience and customer satisfaction.

Team Project Title:

Home-vices

Project Description:

Our home services website allows users to view reviews from other customers. Users can also schedule appointments, based on their availability and requirements. The website should offer a secure and convenient payment gateway that allows users to pay for services online. It also provides Mobile compatibility.
This website is made using HTML, CSS, JAVASCRIPT and PHP.

FUNCTIONALITIES OF OUR WEBSITE:

1. Booking and Scheduling Functionality:
   Users should be able to book services and schedule appointments with service providers. They should be able to select a date and time for the service and receive confirmation of the booking.

WORDS OF APPRECIATION

About 2 weeks ago, I availed Event Planning, Painting and Cutlery Services, what I loved most about the home services provided by home-vices was the attention to detail. Every aspect of the job was handled with care and precision, and it really showed in the end result. From start to finish, the entire experience was seamless and stress-free - I can't recommend them enough!
